

STUDENT IDEAS FOR A BETTER AMERICA™

*Do you have a great idea?
... Or a better way to do something?*

WANTED: YOUR IDEAS

The National Museum of Education is looking for creative students in grades K-12 who are U.S. students. Enter any idea or invention for a new way to demonstrate an educational concept, an idea for a new product, an improvement for an existing product, a new procedure, or any idea that solves a problem and/or makes life better.

This can be simply an idea that is explained and described, an invention that is a prototype, an invention from a school project, or a project from another competition. All ideas are encouraged and a model is not required.

MISSION STATEMENT

Student Ideas for A Better America™ seeks to encourage the learning, insight, creativity, and workmanship of America's students by recognizing and rewarding their accomplishments.

GOALS

1. To demonstrate that valuable ideas can be created by America's youth.
2. To encourage students to develop their ideas into reality.
3. To move students from passive spectators to active participants.
4. To ignite the faith that students can solve real-world problems.
5. To inspire student pride in learning.
6. To inspire America's pride in her students.

WINNERS

Beginning September 2010, three winners are chosen each month and each will receive \$100.00 and a certificate for his/her idea. Entries are kept for twelve months upon receipt and are considered each month for a year.

JUDGING CRITERIA AND DIVISIONS

Entries are judged on creativity, uniqueness and usefulness. The judging takes into consideration the student's age. There are 3 divisions: Grades: K-5, 6-8 and 9-12.

PRIVACY AND OWNERSHIP

The National Museum of Education is granted permission to use the entrant's name, photograph, likeness, and entry materials including the design, prototype, and inventions for publicity purposes. Students retain ownership and all rights to the design, prototype and inventions.

ADDITIONAL BENEFITS

Winning entries are eligible for induction into the National Gallery for America's Young Inventors. Six student inventors are inducted annually into the National Gallery, the museum where "Dreams Never Die". Educational inventions may receive royalties as seen on CNN and CBS may also be featured in highly circulated national science catalogs.

HOW TO SUBMIT IDEAS

Complete the Submission Form and mail along with the description of your idea/invention along with drawings, sketches, etc.(photo, video optional) to

National Museum of Education
80 W. Bowery St., Suite 305
Akron, OH 44308
